PROFESSIONAL SUMMARY

Computer Science (AI) undergraduate with hands-on experience in full-stack development, AI-powered applications, and software engineering internships. Proficient in Python, C, machine learning, REST APIs, and full-stack web development. Seeking a software engineering or AI/ML internship to build scalable, impactful products.

EDUCATION

B.Tech — Computer Science & Engineering (Artificial Intelligence)

Aditya College of Engineering, JNTUA, Madanapalle | 2023 – 2027 | Pursuing

Intermediate

Venkata Reddy Siddhartha Jr College, Madanapalle, Andhra Pradesh | 2021 – 2023 | 70% | First Class

Secondary School Certificate (Class 10)

ZP High School Basinikonda, Madanapalle | 2021 | 100% | Distinction

TECHNICAL SKILLS

Programming: Python, C

AI & ML: Machine Learning, Neural Networks, Data Structures & Algorithms

Web & Database: Full Stack Development, SQL, DBMS

Hardware & Systems: Embedded Systems, Arduino, LAN/WAN Networking

INTERNSHIP EXPERIENCE

Software Development Intern | ENKONIX Software Services Pvt. Ltd. | April 2026 – July 2026

Completed a 3-month internship contributing to live software development projects across the SDLC.

Assisted in application development, testing, debugging, and technical documentation for client-facing features.

Gained hands-on experience with SDLC workflows, team collaboration, and structured problem-solving.

Recognized by the team for sincerity, dedication, and quick learning throughout the internship.

PROJECTS

ReelGen AI — AI-Powered Reel Generation Platform | React.js | Vite | FastAPI | Python | REST API

Developed an AI-powered web application for generating social media reels using React.js, Vite, FastAPI, and Python.

Integrated REST APIs for user authentication and AI-based reel generation, ensuring seamless frontend-backend communication.

Designed a responsive, modular interface architecture to improve performance, scalability, and maintainability.

AI Smart Attendance System | Python | Face Recognition | Real-Time Detection

Developed an AI-based attendance management system using face recognition for automatic student identification and attendance marking.

Implemented real-time face detection and recognition to reduce manual attendance errors and proxy attendance.

Built features for attendance recording, student database management, and automated report generation.

Improved attendance accuracy and reduced the time required for classroom attendance management.

Help-Link — Local Assistance Platform | System Design | REST API | GPS Tracking | UPI Payments | 2024

Designed a 3-tier hyperlocal service platform with GPS-based location matching and UPI payment integration, targeting 500+ concurrent users across help-seekers, providers, and admins.

Reduced estimated user-to-service response time by 50% through dynamic request routing and proximity-based provider allocation in the system architecture.

CERTIFICATIONS

Getting Started with Artificial Intelligence — IBM SkillsBuild (Jul 2026)

Troubleshoot Your Code Using IBM Bob — IBM SkillsBuild

Edunet – SkillsBuild Orientation (Dec 2024)

English Language for Competitive Exams — NPTEL, 12-week course (Jul–Oct 2025)

Certificate of Participation — Entrepreneurship Awareness Program, MSME, Government of India (Feb 2026)
